

# DMS Services

## Data Mobility Systems: Predictive Modeling for Better Decisions

### DMS Power

Full evaluations of gas turbine CSAs/LTSAs to support negotiations and ongoing assistance for clients opting to self-maintain.

### DMS Water

Water Treatment Oversight and consulting for all Industrial Water Treatment needs including Power Plants, Paper Mills, and more.

At DMS, we use our own, internally-developed sophisticated software that models power plants and other industrial processes. With thousands of possible data points, no detail is too small for our models. Our innovative methods enable our consultants to thoroughly review information, providing engineering, financial and What If analysis which brings transparency to a client's processes.

# Experience with the Latest Technology: Speed, Accuracy and Value

## WATER TREATMENT

## MAINTENANCE PARTS PLANNING

Sophisticated models are only useful if they can be modified for any particular task. At DMS we create all our software in house and we are able to customize all our models to fit each project. Also, by not using spreadsheets, we eliminate the largest cause for errors in engineering analysis and we are able to maintain a database for each client's tasks. Speed, Accuracy & Value – all possible with our technologically advanced analysis methods.

### EXPERIENCE

Data Mobility Systems creates and maintains its own proprietary software to support selected consultants. All DMS consultants have extensive experience in their field and are networked so they can easily confer with each other, expanding their individual capabilities. Clients reap the benefits of multiple qualified consultants working together.

### MAINTENANCE PARTS PLANNING

DMS uses a sophisticated software application that provides gas turbine professionals with the power to make better maintenance decisions quicker and more efficiently. Our innovative software enables our consultants to quickly model individual power plants or fleet-wide gas turbine facilities completely analyzing the demand for parts and services. Together with our legal partners, we support:

- CSA/LTSA/MMP negotiation/renegotiation support
- Evaluation of multiple operating scenarios
- Ongoing evaluations to ensure continual savings on maintenance agreements
- Ongoing support for self-maintenance facilities

### WATER TREATMENT

All DMS consultants have 20 or more years of experience in the field of water chemistry. DMS provides full Water Treatment Oversight to save clients money and answer all water treatment needs. Using our proprietary software, we provide:

- Plant design and modeling
- Water treatment performance evaluation
- Modified water treatment system performance evaluation
- Water chemistry process calculations
- Review and validation of all chemical programs - and more.
